# GENERAL CHARACTERISTICS

*Based on John's responses, the report has selected general statements to provide a broad understanding of his work style. These statements identify the basic natural behavior that he brings to the job. That is, if left on his own, these statements identify HOW HE WOULD CHOOSE TO DO THE JOB. Use the general characteristics to gain a better understanding of John's natural behavior.*

John can be aggressive and direct, but still be considerate of people. Other people realize that directness is one of his great strengths. He is driven toward goals completion and wants to be in a position to set policy that will allow him to meet those goals. He is a self-starter who likes new projects and is most comfortable when involved with a wide scope of activities. He embraces visions not always seen by others. John's creative mind allows him to see the "big picture." John enjoys authority, independence and the freedom that goes with his aggressive approach to problem solving. Most people see him as a high risk-taker. His view is, "nothing ventured, nothing gained." He prefers an environment with variety and change. He is at his best when many projects are underway at once. He likes to be forceful and direct when dealing with others. His desire for results is readily apparent to the people he manages. John has high ego strengths and may be viewed by some as egotistical. He wants to be seen as a manager who is totally keyed to results. He wants to get things done in a manner that is consistent with his perception of the "right way" of doing things.

John finds it easy to share his opinions on solving work-related problems. Sometimes he becomes emotionally involved in the decision-making process. He prefers authority

## GENERAL CHARACTERISTICS

equal to his responsibility. He is decisive and prefers to work for a decisive manager. He can experience stress if his manager does not possess similar traits. When faced with a tough decision, he will try to sell you on his ideas. He should realize that at times he needs to think a project through, beginning to end, before starting the project. He has the unique ability of tackling tough problems and following them through to a satisfactory conclusion. He will work long hours until a tough problem is solved. After it is solved, John may become bored with any routine work that follows.

John should exhibit more patience and ask questions to make sure that others have understood what he has said. He tends to be intolerant of people who seem ambiguous or think too slowly. He may lose interest in what others are saying if they ramble or don't speak to the point. His active mind is already moving ahead. His creative and active mind may hinder his ability to communicate to others effectively. He may present the information in a form that cannot be easily understood by some people. John challenges people who volunteer their opinions. He may lack the patience to listen and communicate with slower acting people. He may sometimes mask his feelings in friendly terms. If pressured, John's true feelings may emerge. He tends to influence people by being direct, friendly and results-oriented.

# INTRODUCTION

Classifying management behavior is not an easy undertaking, largely because there are so many variables on which classifications could be based. The classifications in this report are purely behavioral. Behavioral measurement can be classified as how a person will do a job. No consideration has been given to age, experience, training or values.

Your report will graphically display your behavioral skills in 12 specific factors. Each factor was carefully selected allowing anyone to be successful if they meet the behavioral demands of the job.

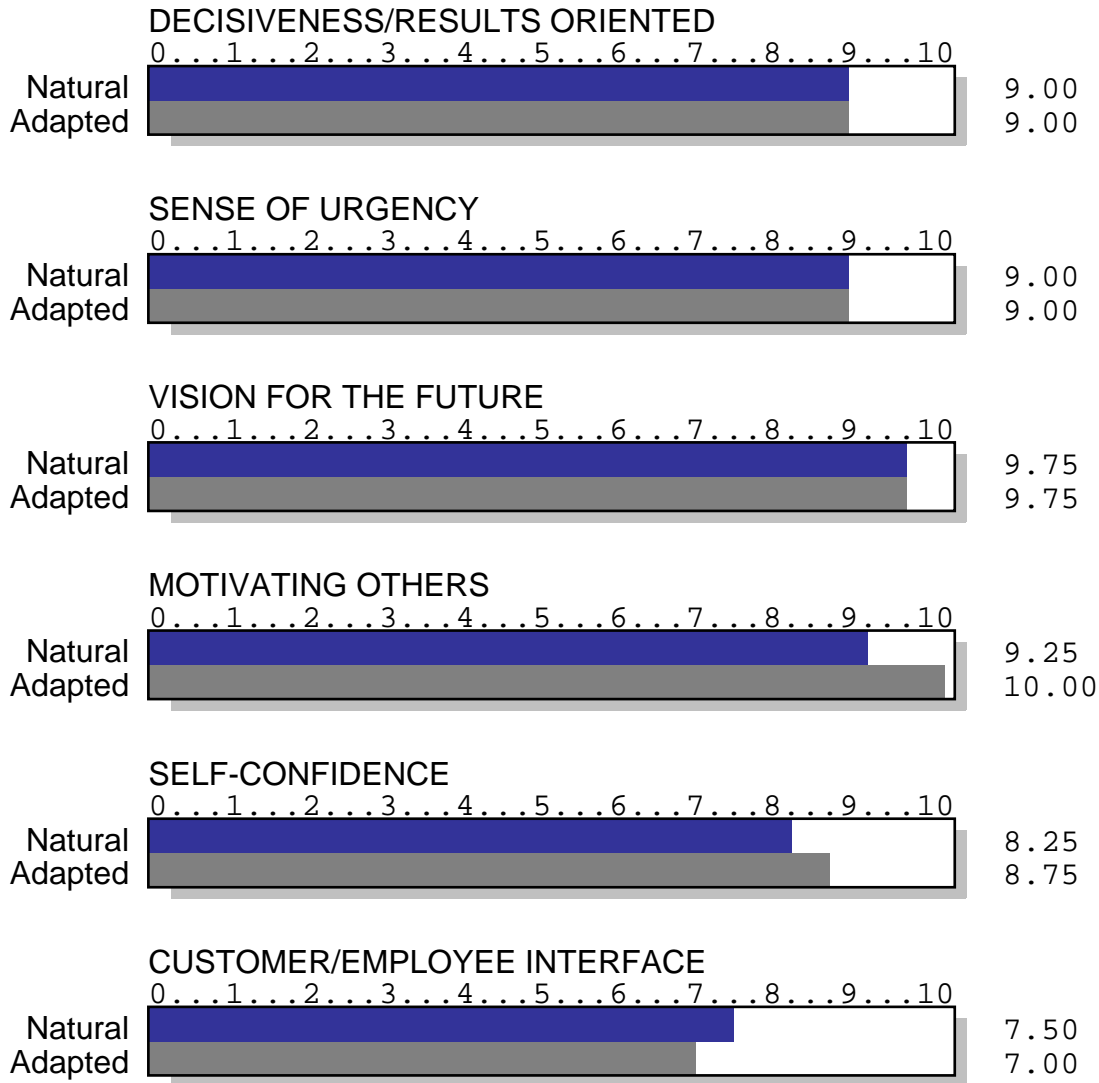

The Natural graph represents your natural behavior - the behavior you bring to the job. The Adapted graph measures your response to the environment - the behavior you think is necessary to succeed at a job. If your Adapted graph is significantly different from your Natural, you are under pressure to change or "mask" your behavior.

Read and compare your graphs. Look at each factor and the importance of that factor to the successful performance of your job. Your Adapted graph will identify the factors you see as important and shows you where you are focusing your energy.

Knowledge of your behavior will allow you to develop strategies to win in any environment you choose.

# THE SUCCESS INSIGHTS® WHEEL

The Success Insights® Wheel is a powerful tool popularized in Europe. In addition to the text you have received about your behavioral style, the Wheel adds a visual representation that allows you to:

- View your natural behavioral style (circle).
- View your adapted behavioral style (star).
- Note the degree you are adapting your behavior.
- If you filled out the Work Environment Analysis, view the relationship of your behavior to your job.

Notice on the next page that your Natural style (circle) and your Adapted style (star) are plotted on the Wheel. If they are plotted in different boxes, then you are adapting your behavior. The further the two plotting points are from each other, the more you are adapting your behavior.

If you are part of a group or team who also took the behavioral assessment, it would be advantageous to get together, using each person's Wheel, and make a master Wheel that contains each person's Natural and Adapted style. This allows you to quickly see where conflict can occur. You will also be able to identify where communication, understanding and appreciation can be increased.
